MASS I.T TRAINING)

- web and app development

PROFILE

Creative and community-focused Web Developer with experience designing responsive, accessible, and visually compelling websites. Developed strong technical and communication skills through hands-on work at Spherical and personal projects. Known for combining clean code with thoughtful design to serve and uplift underrepresented communities. Actively seeking opportunities to contribute to purpose-driven teams while continuing to grow as a full-stack developer.

MY PROJECTS

Currency Converter Web-App

- A React-based currency converter app that allows users to convert amounts between different currencies using real-time exchange rates from the ExchangeRate API.
- [Click to see](#)

Password Generator Web-App

- This is a React-based Password Generator that allows users to create strong, customizable passwords. Users can choose to include uppercase letters, numbers, and symbols, adjust the password length with a slider, and easily copy the generated password to the clipboard with a single click.
- [Click to see](#)

Instagram Like App

- Using firebase i have created a app where we can use CURD operations still working in it . Technologies used : simple JS , CSS , Bootstrap , HTML , Firebase
